

Nail Base Roofing Insulation - Vented and Standard

- High performance, closed cell expanded polystyrene (EPS) rigid foam insulation board bonded to 7/16" OSB on the top side
- Combines nailing surface and insulation in thickness from a minimum of 1.5" inches thick to a maximum of 9" inches thick
- Panel Size: 4' wide x 8' long
- All panels are produced with square and flush edges
- EPS foam insulation contains no CFC's and HCFC's
- ABT Foam's Nail Base Insulation saves labor with one step installation
- Cost effective solution for adding a nailing surface attached to high performance insulation
- EPS R-values may be used without adjustment for aging
- EPS mold resistance tests favorably in accordance with ASTM C 1338
- Nail Base Panels are ideal for residential and commercial construction
